

Item	Code
DUBAI LITTER BIN	AC003/V
Finishing	
GALVANISED AND POWDER COATED STEEL	

Cylindrical waste bin made entirely of 12/10 mm thick steel sheet for strength and durability.

The top lid has a Ø175mm opening for the waste introduction and an integrated removable ashtray, also available in a fixed version. It is equipped with a universal key locking system for secure closure and controlled access.

The unit is supplied with an internal liner, Ø 358 mm H.630 mm, manufactured in hot-dip galvanized steel.

The raised base, which is detachable, presents holes for rainwater runoff or periodic cleaning that can also be used to anchor the bin to the ground. It can be manufactured either in galvanized and powder-coated steel or in stainless steel.

The metal parts are galvanised and coated with thermosetting polyester powders (available in the various RAL colour).

All hardware is made of stainless steel.
